

ASIP Summer Research Opportunity Program in Pathology

The major objective of the **ASIP Summer Research Opportunity in Pathology Program (SROPP)** is to provide meaningful biomedical research experiences for undergraduate students who are considering careers in research.

Undergraduate students spend 10 weeks doing research in the laboratory of an ASIP member. Supported students receive complimentary membership in the ASIP for one year!

Members who are interested in this opportunity or interested in hosting an undergraduate student during SROPP 2025 should contact Dr. Bill Coleman at [wbcoleman@asip.org](mailto:wbc Coleman@asip.org).
